Performance Review and key developments

During the quarter under review, as per mandated Indian Accounting Standards (IND-AS), Cement EBITDA stood at ₹801/ton, up Rs315/ton YoY basis. On comparable basis and including operating income Cement EBITDA for the quarter was at ₹908/ton, up from ₹594/ton during the quarter ended March 31st, 2016. The above performance was on the back of volume growth of ~15%, better realizations and curtailing overall costs despite increase in fuel prices. For the quarter ended March 31, 2017, the Company sold 15.6 lac tons of cement and clinker as against 13.6 lac tons for the quarter ended March 31, 2016. All the numbers mentioned herein exclude clinker sales for third party processing, if any.

During FY17, as per IND-AS, Cement EBITDA stood at ₹588/ton as compared to ₹372/ton in FY16. As per earlier Accounting Standard IGAAP, the EBITDA stood at ₹698/ton as compared to ₹477/ton in FY16. The Division has seen improved operating performance on the back of ongoing cost rationalization measures and better realizations. The Division reduced power cost due to purchase of power under the Group Captive Arrangement as per the Electricity Rules, 2005. The Division also managed to optimize on logistic costs despite increase in fuel price during the later part of the year.

For the year as a whole, the Company sold 52.1 lac tons of cement and clinker as against 52.9 lac tons in FY16. The Cement Division's performance should be viewed in light of two major events, the heavy monsoons in the region that the Company sells cement and demonetization. While the first and fourth quarter saw volume growth the second and third quarter volumes were impacted by above events. Notably, the month of March saw the best ever volume for the Division surpassing previous highs. All the three premium / better priced brands such as 'Hitech', 'Duratech' and 'Champion Plus' are well accepted in the markets and together contribute nearly 11 percent of overall volumes as compared to 6 percent in FY16.

H & R Johnson (India) (HRJ) Division operates in the TBK (Tile Bath Kitchen) Segment. The Division's standalone sales revenues during the quarter ended March 31, 2017 were `527 Cr as compared to `599 Cr in the corresponding quarter of last year. The Division continued to scale-up its marketing activities through various initiatives like strengthening of distribution network, merchandising and also taken initiatives to optimize the costs.

During FY17 HRJ division reported standalone revenues of `1863 Cr as compared to `2220 Cr in FY16, de-growth of ~16%. On a consolidated basis revenues were at `1882 Cr as compared to `2228 Cr, de-growth of ~16%. It reported EBITDA of `7 Cr on consolidated basis (according to IND AS) as compared to `77 Cr in FY16.

The RMC Readymix (India) (RMC) Division's sales turnover decreased by 7% as compared to the corresponding Quarter of last year. Turnover increased by 3% compared to the trailing Quarter.

During FY17, the RMC Division sales turnover declined marginally by ~1% as compared to FY16. EBITDA was at `38 Cr as compared to `52 Cr in the previous year.

Industry Scenario / Future Outlook

With the Government advancing in the right direction with intent and resolve supported by interest rate cuts from RBI augurs well for the industry. The Government's continued thrust on core schemes such as 'Make in India', 'Smart Cities', 'Housing for All by 2022', 'Dedicated Freight Corridors', 'Swachh Bharat Abhiyan', 'Atal Mission for Rejuvenation and Urban Transformation' (AMRUT) and push for fast track roads and highways will bolster the construction industry leading to increased demand for cement, tiles and ready mix concrete. There would be incremental demand from Government-backed projects.

The Company sells its cement in three States – Uttar Pradesh, Madhya Pradesh and Bihar. These States have also re-aligned with Government's thrust on development as core agenda with increasing spend on infrastructure and housing in State Budgets. Most States have cleared the Real Estate Bill, which would bring in transparency and better execution. All the above initiatives would lead to better cement demand in the medium to long term.

The H & R Johnson (India) Division continues to possess robust distribution network, strong brand equity, wide-spread manufacturing locations, and a comprehensive product portfolio of tiles, baths, and kitchens. The focus is on increasing the utilization levels and better working capital management. The Division intends to further improve the product display of value added products. Implementation of GST in due course would result in benefit for organized sector including your company. Efforts are also on to increase presence in unrepresented markets.

The markets in many of the metros are expected to see a turnaround in the near term as economy picks up and construction activities resume. With the Mega Projects Vertical, RMC Division is focusing to cater the infrastructure segment, which has witnessed significant increase in order book. The Company has taken measures, which going forward would help to improve operational efficiency and productivity. The markets in tier 2 & tier 3 cities have also been showing maturity which will help industry's growth.

Overall Prism Cement as a company is well placed with cost initiatives and operating efficiencies to leverage the growing opportunities.
